Professional Summary

Dedicated Computer Science Education graduate with strong experience in ICT teaching and modern software development. Skilled in HTML, CSS, JavaScript, React JS, and Python. Experienced in teaching students and children programming both physically and online. Passionate about technology education, coding, and mentoring learners to develop problem-solving and digital skills.

Career Objective

To work as a Coding Instructor / Tech Educator where I can teach programming, mentor learners, and contribute to technology education while growing professionally in software development and digital training.

Education

Bachelor of Education (B.Ed) in Computer Science Education — University of Benin (UNIBEN), 2025
Research Project: The Awareness of Artificial Intelligence among Senior Secondary School Students in Mainland Lagos.

Professional Experience

Coding Instructor (Online Tutor) — Rubies Code School (Remote, Zoom) | 2025 – Present

- 1 Teach children programming and foundational coding skills through live interactive Zoom sessions
- 2 Deliver structured lessons in HTML, CSS, JavaScript, and programming fundamentals
- 3 Guide students through hands-on coding exercises, mini projects, and practical problem-solving tasks
- 4 Design beginner-friendly curriculum and coding activities suitable for young learners
- 5 Break down complex technical concepts into simple, easy-to-understand steps
- 6 Encourage creativity, logical thinking, and confidence in programming
- 7 Support students individually during coding practice and debugging
- 8 Assess student progress and provide feedback to improve coding understanding

ICT & Data Processing Teacher — Garden of Success School, Lagos | 2023 – 2025

- 1 Taught ICT and Data Processing to junior and senior secondary students
- 2 Delivered lessons in Web Design, Presentation Packages, Graphical Packages, and Computer Maintenance
- 3 Introduced students to basic programming and web development concepts
- 4 Prepared lesson plans, notes, class activities, and student assessments
- 5 Supervised student practical projects and technology-based assignments
- 6 Mentored students in digital literacy, typing skills, and computer operations
- 7 Maintained classroom discipline and promoted interactive learning
- 8 Organized revision sessions and supported students during exams

Technical Skills

- 1 HTML5, CSS3, JavaScript, React JS, Python
- 2 Git & GitHub (Version Control & Collaboration)
- 3 Web Deployment: GitHub Pages, Netlify
- 4 Database Fundamentals (DBMS Concepts)
- 5 Microsoft Office Suite (Word, Excel, PowerPoint)
- 6 Computer Maintenance & Troubleshooting

Teaching & Soft Skills

- 1 Coding Instruction & Programming Mentorship
- 2 Curriculum & Lesson Planning
- 3 Classroom & Online Teaching Management
- 4 Student Mentoring & Academic Support
- 5 Communication & Presentation Skills
- 6 Problem Solving & Logical Thinking
- 7 Team Collaboration

Projects

- 1 Web Development: Built responsive websites using HTML, CSS, JavaScript, and React. Implemented layouts, navigation systems, and interactive features. Managed and deployed projects using GitHub and Netlify.
- 2 React Projects: Developed interactive user interfaces using React components, props, and state management. Built dynamic pages and reusable UI components.
- 3 Python Programming: Created basic scripts and logic-based programs. Practiced problem-solving, debugging, and algorithmic thinking using Python.
- 4 AI in Education Research: Conducted field research on AI awareness among secondary school students. Designed questionnaire, collected data, analyzed results, and presented findings.
